

Summit Bechtel Course Guide — Drive & Walk

A read-only guide for riders and scouts on foot — no password, nothing to edit.
dfreeriks-snow.github.io/bechtel-course-guide/?view=1

1 Open & install

- On the device, open the read-only link **dfreeriks-snow.github.io/bechtel-course-guide/?view=1** in **Safari**.
- **Share** → **Add to Home Screen**, then launch it from the icon (fullscreen).
- Tap **Allow** for Location (choose 'While Using').

2 Drive or walk the tour

- The app opens in ■ **Drive** mode — mount the device facing your passengers. As you approach each tagged site, its card **pops up automatically**. Just talk to it.
- On foot? Tap ■ **Walk** (top-left) — closer zoom for a 2 mph pace, same auto-popping cards.
- Tap **any point** to preview its info; ■ **Search** (top bar) jumps the map to a place by name.

3 Explore the map

- **Drag the map** to look around — following pauses so you can explore. Tap **Recenter** (bottom-right) to snap back to your location.
- **Map style**: use the layer dropdown (or the ■ menu on a phone) for **Streets, Topo, Satellite, or Trails**.

4 Plan a route (optional)

- Tap ■ **Guide**, add stops by tapping points on the map or the dropdown, pick **Drive** or **Walk**, and read the **total time & miles**.

5 Before you lose signal

- Open ■ **Settings** → **Download this area for offline** so the map works with no service.

This is the view-only link — there is no Plan/edit mode and no password. Safe to share widely with riders, families, and volunteers.
